PROFILE

AI/ML Engineer and co-author of a published arXiv paper on Thai voice cloning (JaiTTS, 2026). Computer Engineering graduate from SIIT (GPA 3.65/4.00) with production experience in speech AI, model fine-tuning, and end-to-end NLP systems. Proven ability to deliver results — reduced ASR Character Error Rate from 44% to 2.75% during internship at Jasmine Technology Solution. Seeking an AI/ML Engineer role to grow across the full ML lifecycle — from research and experimentation to scalable production deployment.

WORK EXPERIENCE

Jasmine Technology Solution - AI Engineer Intern

Jan 2026 - May 2026

- Contributed to a Thai speech data collection and processing pipeline for TTS model development.
- Built a YouTube audio scraping utility to support large-scale Thai speech data collection.
- Built a Thai speech-processing pipeline integrating source separation, audio restoration, VAD segmentation, ASR transcription, and automated quality checks.
- Fine-tuned a 1.7B-parameter MOSS-TTS model on 550 hours of Thai speech, reducing character error rate from 44.01% to 2.75%.
- Trained a duration predictor for F5-TTS inference using XLM-RoBERTa with a regression head, improving MAE from 1.70s to 1.09s and reducing CER from 4.78% to 4.32%.

RESEARCH

JaiTTS: A Thai Voice Cloning Model — Co-author, arXiv:2604.27607, 2026

- Developed evaluation interface for TTS model comparison.
- Built a long sentence test set for TTS evaluation.
- Evaluated audio tokenizers and restoration models for Thai voice cloning.

PROJECT

Thai Sentiment Analysis Web Application

Aug 2025

- Fine-tuned WangchanBERTa on approximately 25,000 labeled Thai sentences for 3-class sentiment classification, achieving 78% accuracy.
- Converted a 4-class Wisersight dataset into a 3-class sentiment setup through preprocessing and label mapping.
- Built an end-to-end NLP application with model fine-tuning, FastAPI inference API, and JavaScript frontend.

EDUCATION

Aug 2022 - May 2026

Sirindhorn International Institute of Technology

Bachelor of Engineering, Computer Engineering | GPA : 3.65/4.00

Relevant Coursework: Machine Learning, Natural Language Processing, Deep Learning, Computer Vision, Database Systems, Big Data Analytics

SKILLS

Programming: Python
Libraries: PyTorch, Hugging Face Transformers, Hugging Face Accelerate, scikit-learn, NumPy, Pandas, Librosa, Whisper, yt-dlp
Backend: FastAPI
Databases: MySQL, SQLite, Pinecone
Tools: Git, Docker, Linux, Jupyter Notebook, Google Colab, Weights & Biases
Languages: Thai (Native), English (CEFR C1)

ACHIEVEMENTS

SIIT Academic Scholarship	2024 - 2025
Cyberwarrior Hackathon – Semi-Finalist Designed a prototype cybercrime investigation tool for scam call network analysis	Jul 2025
GHB Open Innovation Hackathon – Finalist, Honorable Mention Proposed a data-driven Rent-to-Own housing concept integrating solar financing and alternative credit scoring	Jul 2025
Health&Innovation Hackathon - Finalist Designed an AI-powered EMS dashboard integrating YOLOv8 and speech-to-text to automatically extract and visualize critical patient data.	Sep 2025
Mitr Phol GenAI Hackathon - Finalist Designed a GenAI copilot system for real-time boiler optimization, predictive safety, and weather-based tuning.	Oct 2025
Super AI Engineer Season 6 - Level 2 (Selected top 157 of 10,457 applicants) - Developed AI prototypes for real-world use cases, including RAG chatbots, sales forecasting, and CCTV object detection. - Won 1st place twice and Judge's Favorite Award across 4 team hackathons 3rd place in individual Kaggle hackathon (avg. score of 5 competitions)	May 2026 - Jun 2026
