PROFILE

Computer Engineering student at SIIT (GPA 3.64/4.00) with hands-on experience in speech data pipeline development and fine-tuning large-scale TTS models. Completed an AI Engineer internship focused on Thai TTS data pipelines and model fine-tuning. Co-author on an arXiv publication in Thai speech synthesis. Experienced in NLP, audio processing, and backend development with FastAPI. Seeking a full-time AI/ML Engineer position upon graduation in 2026.

WORK EXPERIENCE

Jasmine Technology Solution - AI Engineer Intern

Jan 2026 - May 2026

- Contributed to Thai speech data collection pipeline development
- Built a YouTube audio scraping utility to support TTS training data collection
- Adapted audio processing pipeline (based on Emilia and MOSS-TTS) for Thai speech, covering source separation, speech restoration, VAD segmentation, ASR transcription, and quality control
- Fine-tuned MOSS-TTS (MossTTS Local 1.7B) on 550 hours of Thai speech data, reducing Character Error Rate from 44.01% (pretrained baseline) to 2.75%
- Trained a duration predictor for F5-TTS inference using XLM-RoBERTa with a regression head, improving MAE from 1.7s to 1.09s over the byte-counting baseline reducing Character Error rate from 4.78% to 4.32%
- Read and evaluated TTS research papers to guide technical decisions on model selection, pipeline design, and hyperparameter tuning

PUBLICATION

Karnjanaekarin, J., Trakuekul, P., Panitsrisit, N., Sumanakul, S., Nitayasomboon, V., **Guntasin, N.**, Denkavin, T., & Rutherford, A.T. (2026). **JaiTTS: A Thai Voice Cloning Model**. **arXiv:2604.27607**.

- Built TTS evaluation interface, constructed test set, and evaluated audio tokenizers and restoration models

PROJECT

Thai Sentiment Analysis Web Application

Aug 2025

- Fine-tuned WangchanBERTa on ~25,000 labeled Thai sentences for 3-class sentiment classification (adapted from 4-class Wisersight dataset), achieving 78% accuracy
- Built an end-to-end NLP system: data collection, model fine-tuning, FastAPI backend, and JavaScript frontend deployment

EDUCATION

Sirindhorn International Institute of Technology

Aug 2022 - May 2026 (Expected Graduation)

Bachelor of Engineering, Computer Engineering | GPA : 3.64/4.00

Relevant Coursework: Machine Learning, Natural Language Processing, Deep Learning, Computer Vision, Database Systems, Big Data Analytics

SKILLS

Programming: Python
Libraries: PyTorch, Hugging Face Transformers, Hugging Face Accelerate, scikit-learn, NumPy, Pandas, Librosa, Whisper, yt-dlp
Backend: FastAPI
Databases: MySQL
Tools: Git, Docker, Linux, Jupyter Notebook, Google Colab, Weights & Biases
Languages: Thai (Native), English (CEFR C1)

ACHIEVEMENTS

SIIT Academic Scholarship	2024-2025
Cyberwarrior Hackathon - Semi-Finalist Designed a prototype cybercrime investigation tool for scam call network analysis	Jul 2025
GHB Open Innovation Hackathon - Finalist, Honorable Mention Proposed a data-driven Rent-to-Own housing concept integrating solar financing and alternative credit scoring	Jul 2025
Health&Innovation Hackathon - Finalist Designed an AI-powered EMS dashboard integrating YOLOv8 and speech-to-text to automatically extract and visualize critical patient data.	Sep 2025
Mitr Phol GenAI Hackathon - Finalist Designed a GenAI copilot system for real-time boiler optimization, predictive safety, and weather-based tuning.	Oct 2025
Super AI Engineer Season 6 - Level 2	May 2026
