WORK EXPERIENCE

AI Engineer (Contract) — Artificial Intelligence Association of Thailand (AIAT) **Aug 2026 – Present**

- Built 10 web scrapers to collect Thai public data for a government agency's provincial development dashboard.
- Designed the KPI definitions and calculations, merging records that described the same person or business across websites and reporting only the KPIs the data could reliably support.
- Developed the dashboard section showing the KPIs by province, with drill-down to the underlying records.

AI Engineer Intern — Jasmine Technology Solution **Jan – May 2026**

- Built a 6-stage pipeline turning about 1,000 hours of raw Thai audio into 400 hours of clean TTS speech, covering speech enhancement, diarization, quality filtering, Whisper transcription, and speaker matching.
- Fine-tuned MOSS-TTS Local (1.7B, not optimized for Thai) on 550 hours, cutting Character Error Rate (CER) from 44.01% to 2.775%, on par with the state-of-the-art OmniVoice.
- Trained an XLM-RoBERTa duration predictor for F5-TTS, cutting timing error (MAE) 36% vs. a byte-count baseline and CER from 4.78% to 4.26%.

RESEARCH

JaiTTS: A Thai Voice Cloning Model — Co-author | arXiv | GitHub **Apr 2026**

- Developed the blind A/B listening-test app in Streamlit, used for the paper's human evaluation, where JaiTTS won 283 of 400 comparisons vs. commercial models.
- Co-created a 231-case long-duration test set and evaluated audio tokenizers and restoration models.

PROJECTS

Scrybe: RAG Academic Chatbot — Senior Project, Data & AI Lead (team of 4) **Aug – Dec 2025**

- Implemented knowledge-base ingestion and designed the n8n RAG workflow that routes each query, retrieves from Pinecone, reranks results, and generates grounded answers over SIIT documents in 7 domains.
- Evaluated the system: 0.93 recall@3 and 0.76 precision@3; LLM-judged faithfulness 0.93 and correctness 0.92; helpfulness rated 0.82 by 20 students and 0.98 by 2 staff on a 0–1 scale.

Thai Sentiment Analysis Web Application | GitHub **Aug 2025**

- Built a Thai sentiment web app with a FastAPI backend, containerized with Docker Compose and Nginx, using WangchanBERTa fine-tuned on about 25,000 labeled Thai sentences, with 78% accuracy on 3 classes.

ACHIEVEMENTS

Super AI Engineer Season 6 — Level 3, Bronze Medal for overall performance **May – Sep 2026**

- Selected for Level 2 (157 of 10,457 applicants) of Thailand's national AI talent program; reached Level 3.
- Won 1st place twice and Judge's Favorite across 4 team hackathons; 3rd in an individual Kaggle competition.

Mitr Phol GenAI Hackathon — Finalist: GenAI copilot for real-time boiler optimization **Aug – Oct 2025**

Health & Innovation Hackathon — Finalist: AI EMS dashboard using YOLOv8 and speech-to-text **Sep 2025**

EDUCATION

Sirindhorn International Institute of Technology **Aug 2022 – May 2026**

Bachelor of Engineering, Computer Engineering | GPA: 3.65/4.00 | First Class Honors
Scholarship: SIIT Academic Scholarship, 25% tuition, renewed for 3 consecutive semesters on merit (2024 – 2025)

SKILLS

Programming & Data: Python, SQL, JavaScript, NumPy, Pandas, Matplotlib, Seaborn, Requests, BeautifulSoup
ML / DL: PyTorch, Hugging Face Transformers, scikit-learn, OpenCV, PyThaiNLP
LLM & RAG: vLLM, Pinecone, Cohere Rerank, n8n, Gemini & Claude APIs, LLM-as-judge evaluation
Speech: Whisper, Silero VAD, DiariZen, F5-TTS, MOSS-TTS
Backend & Tools: FastAPI, Streamlit, Nginx, MySQL, SQLite, Git, Docker, Linux, Weights & Biases
Languages: Thai (Native), English (CEFR C1; B.Eng. taught in English)
