PROFILE

AI/ML Engineer and Computer Engineering graduate from SIIT (GPA 3.65/4.00), co-author of a published arXiv paper on Thai voice cloning (JaiTTS, 2026). Experience spans speech AI, LLM/RAG pipelines, and NLP — including fine-tuning TTS models that reduced Character Error Rate from 44% to 2.75% during an internship at Jasmine Technology Solution. Seeking to grow across the full ML lifecycle, from research and experimentation to production deployment.

WORK EXPERIENCE

Jasmine Technology Solution - AI Engineer Intern

Jan - May 2026

- Built a Thai speech-processing pipeline integrating source separation, audio restoration, VAD segmentation, ASR transcription, and automated quality checks.
- Fine-tuned a 1.7B-parameter MOSS-TTS model on 550 hours of Thai speech, reducing CER from 44.01% to 2.75%.
- Trained a duration predictor for F5-TTS inference using XLM-RoBERTa with a regression head, improving MAE from 1.7s to 1.09s over the byte-counting baseline reducing F5-TTS CER from 4.78% to 4.32%

RESEARCH

JaiTTS: A Thai Voice Cloning Model — Co-author, arXiv:2604.27607, 2026

- Built TTS evaluation UI, constructed test set, and evaluated audio tokenizers and restoration models

PROJECTS

RAG-based Academic Chatbot for University Support

Aug - Dec 2025

- Designed and built an end-to-end RAG pipeline integrating query classification, vector retrieval, reranking, and answer generation via n8n orchestration.
- Achieved 0.93 faithfulness and 0.93 recall@3 in LLM-as-judge evaluation, and 0.82–0.98 helpfulness in human evaluation (20 students, 2 staff).

Thai Sentiment Analysis Web Application

Aug 2025

- Fine-tuned WangchanBERTa on ~25,000 labeled Thai sentences, achieving 78% accuracy.
- Developed an end-to-end Thai sentiment-analysis application with a FastAPI backend and JavaScript frontend.

EDUCATION

Sirindhorn International Institute of Technology

Aug 2022 - May 2026

Bachelor of Engineering, Computer Engineering | GPA: 3.65/4.00 | First Class Honors

SKILLS

Programming: Python, SQL

Libraries: PyTorch, Transformers, Accelerate, scikit-learn, NumPy, Pandas, Librosa, Whisper, yt-dlp, vLLM, uv, OpenCV

Backend: FastAPI

Databases: MySQL, SQLite, Pinecone

Tools: Git, Docker, Linux, Jupyter Notebook, Google Colab, Weights & Biases

Languages: Thai (Native), English (CEFR C1)

ACHIEVEMENTS

Super AI Engineer Season 6 - Level 3, Bronze Medal

May - Sep 2026

- Developed and evaluated AI prototypes under tight hackathon timelines, delivering real-world solutions including RAG chatbots, sales forecasting, and CCTV object detection.
- Won 1st place twice and Judge's Favorite across 4 team hackathons; ranked 3rd in individual Kaggle competition (avg. of 5 tasks)

Mitr Phol GenAI Hackathon - Finalist

Aug - Oct 2025

- Designed a GenAI copilot system for real-time boiler optimization

SIIT Academic Scholarship

2024-2025
